Doing Bat-hang

Photographers

spending too much money
on tech gadgets i don't need

Can fly a looping

and can make passengers throw up

WHAT WE DO

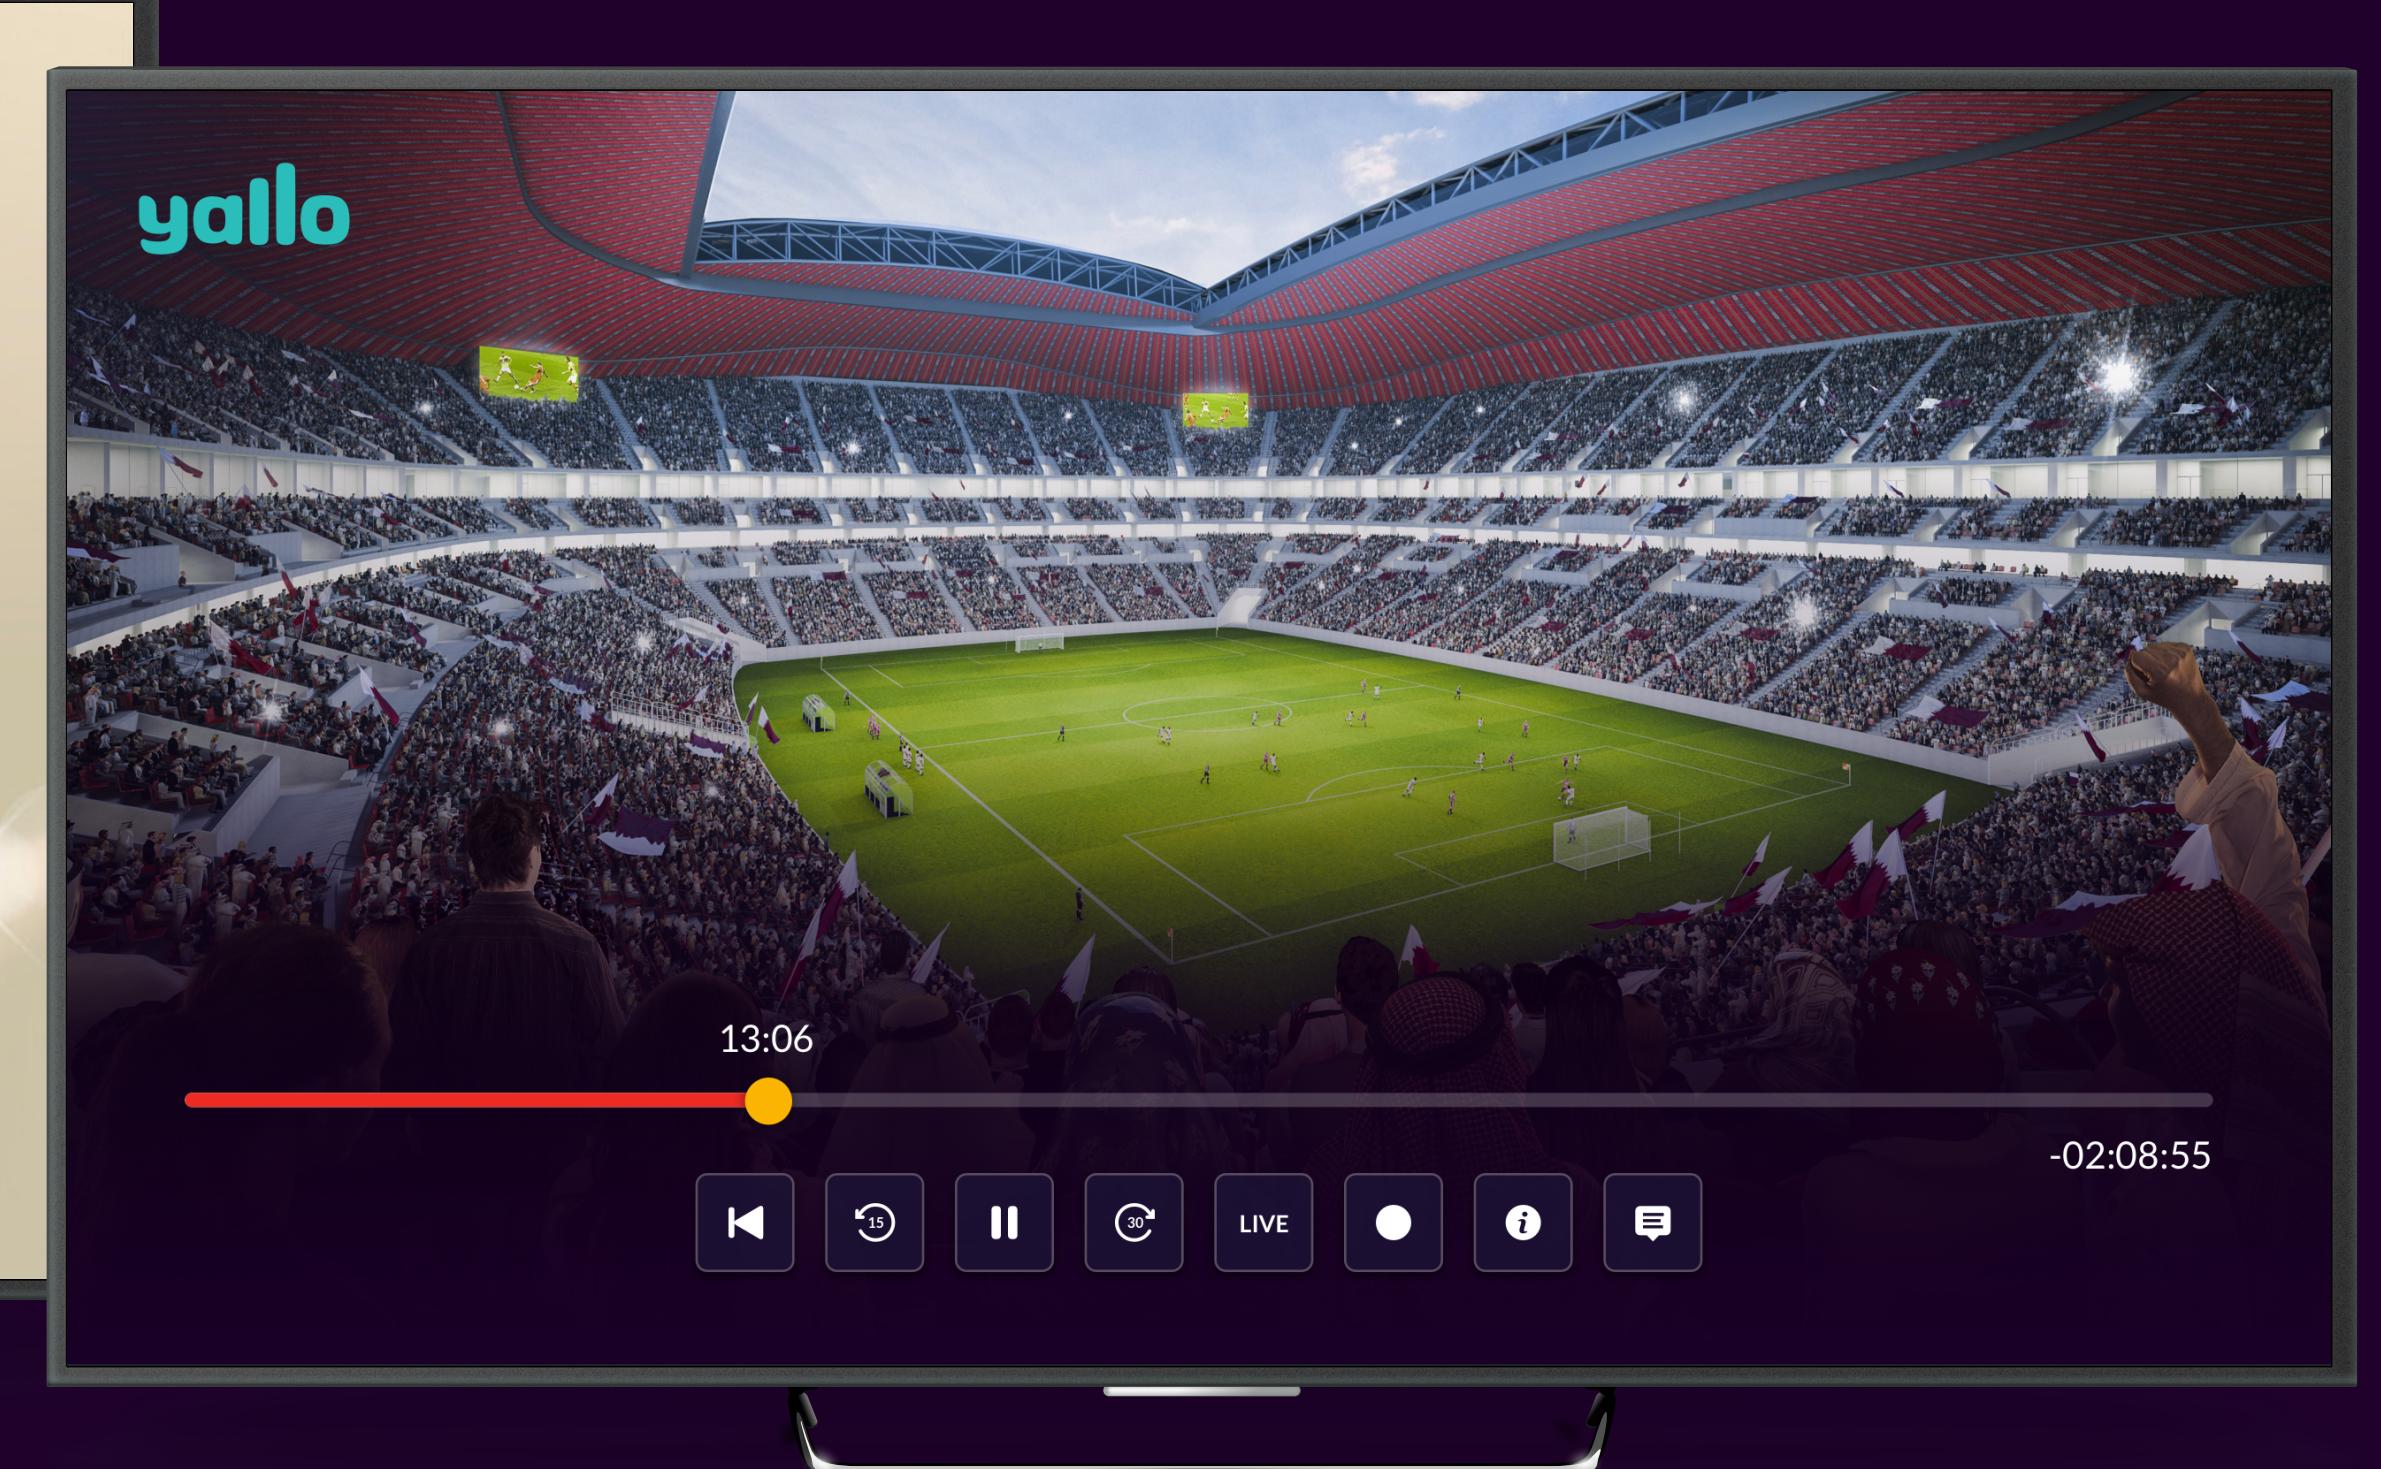

A screenshot of the yallo tv mobile application interface. The main content area displays a promotional image for the TV show "Wir sind die Millers" featuring the cast. To the left, a vertical navigation bar includes icons for search, home, and settings. Below the main screen, a "Replay Highlights" section shows a preview of the show from Wednesday, April 1st at 18:15 - 19:15. The app is shown running on a laptop, a tablet, and a smartphone, illustrating its cross-device compatibility.

WHAT WE DO

A large monitor at the top displays a landing page with the text "WÄHLE DEINEN CLUB" and several club logos, including AJOIE HOCKEY CLUB, EHC, and ZSC LIONS. Below the monitor, a tablet and two smartphones show the MySports mobile application interface. The tablet screen shows a live match between EHC and ZSC LIONS with a score of 0:0. The smartphone screens show a summary of the last game and the top games of the day.

THERES STILL SOME EXCLUSIVE TV CONTENT

YOUR MISSION, SHOULD YOU CHOOSE TO ACCEPT IT...

Integrate your
Surrounding
Environment

Social Media

Live Data from
Sport Event

Interact with
TV Show

Other People
watching same
program

Integrate your Surrounding Environment

YOUR MISSION, SHOULD YOU CHOOSE TO ACCEPT IT...

Social Media

{ We have a tool create media clips }

{ The whole backend is custom made,
we can do whatever we want (and are allowed to) }

{ All Clients are bi-directional connected
to the backend through web-sockets }

Live Data from Sport Event

{ We get for some sports Live
Data through Data-Pipelines }

Interact with TV Show

{ we have endless possibilities }

Other People
watching same

{ We have realtime sessions of
every client connected }

GOOD LUCK
